Profile Summary

Results-driven B.Tech Computer Science student combining strong technical proficiency in full-stack web development with hands-on experience in AI integration and business operations. Adept at building data-driven applications, ensuring operational accuracy through precise data management, and leveraging machine learning for complex problem-solving. Seeking to apply a versatile blend of software development, automation logic, and workflow tracking to deliver high-impact technical and operational solutions.

Skills & Technologies

- **Programming & web:** C, Python, HTML, CSS, Node.js, JavaScript
- **Data & Databases:** DBMS, SQL
- **AI/ML, Automation & Tools:** AI & Prompt Engineering, google workspace, MS Office, Canva, Framer
- **Core Concepts:** OOPs, Data Structures, Algorithms, SDLC, Software Testing
- **Soft Skills:** Problem-Solving, Team Collaboration, Communication, Time Management, Adaptability

Languages Known

Telugu, English, Hindi

Education

- **B.Tech in Computer Science & Engineering (JNTUH)**
Princeton Institute of Engineering and Technology for Women, Hyderabad (2023–2027) CGPA: 8.61/10
- **Senior Secondary (MPC) (TOSS)**
Gayatri Junior College, Wanaparthy (2021–2023) Percentage: 73%

Work Experience

- **Quality Checker Intern (Promoted as Reporting Manager)**

GEMA Education Technology | Sep 2024 – May 2026

- Cross-checked and corrected data ensuring accuracy.
- Used Canva and Google Sheets for efficient data review.
- Recognized for consistent performance.

- **Full Stack Web Development Intern**

Dexterity Edtech Pvt. Ltd | Jun 2024 – Jul 2024

- Worked on front-end and back-end projects.
- Completed multiple assignments and projects.

- **AI & Prompt Engineering Intern**

Vault Of Codes | Apr 2024–May 2024

- Designed AI-powered solutions and refined prompts.

- Collaborated on real-time AI projects.

– Python Programming Intern

Devskill Hub | Feb 2024 – Apr 2024

- Created a Python script to automate progress tracking.
 - Enhanced Python, data structure and problem-solving skills.
-

Projects

– Shabdh Buddhi Kreeda (Interactive Voice-Command Console):

Led a team to develop a screen-free, interactive board game console designed for children with autism and ADHD. Engineered a microcontroller-processed system featuring voice-guided instructions, positive audio feedback, and therapeutic lighting.

– Child-Mortality Prediction Web App

Developed a web-based application utilizing Django and Machine Learning to predict and analyze mortality rates, showcasing full-stack Python development and complex data processing.

– Real-Time Live Sports Scoreboard

Built a dynamic front-end web application using JavaScript to process and display real-time data feeds, demonstrating strong front-end UI and data handling skills.

– Greenhouse Gas Emission Prediction

Leveraged Machine Learning to analyze supply chain data and predict emissions, demonstrating strong analytical logic and data-driven problem-solving.

Trainings & Certifications

– Skill Upgradation Training - Junior Software Programmer - APPC | Nov 2023 - Apr 2024

– Introduction to Data Engineering - IBM | Nov 2023

– Full Stack Development Training - Dexterity Edtech Pvt. Ltd. | Jun 2024 - Jul 2024

Awards & Achievements

– Finalist, Anveshana Innovation Marathon, by Agastya International Foundation: Recognized for engineering a novel hybrid model to analyze water purification levels for agricultural applications.

– Finalist, SAP Code Unnati Innovation Marathon: Recognized for developing "Shabdh Buddhi Kreeda", an innovative tech-for-good project supported by SAP and the Edunet Foundation.

Extracurricular Activity

– Hosted an episode of the IDT series on TSAT Channel, received appreciation certificate.
